EDUCATION

High school diploma in Science

I am currently completing my degree in Computer Science, with only two courses left to finish

EXPERIENCE

I am actively contributing to a software development company, where my role spans across both frontend and backend programming for web applications. My expertise revolves around utilizing ASP.NET technologies to craft robust and scalable solutions. In addition to my current role, I've also ventured into freelancing in the past, gaining valuable experience in diverse projects. Furthermore, I have acquired hands-on experience in developing management software and websites, enhancing my proficiency in creating comprehensive solutions for various business needs
